Libreria modulare Modular bookcase

Designed by *Maurizio Manzoni*

Macao, sistema modulare connotato da composizioni aeree che disegna lo spazio con estrema leggerezza ed eleganza.

Macao, libreria porta TV da parete ha la struttura portante in metallo di sezione quadrata. I ripiani possono essere in frassino nero o noce nazionale, in vetro o in metallo, con cassetti a estrazione totale e rientro frenato. Le mensole si incastrano l'una con l'altra creando giochi di geometrie e di luci riflesse. Con la sua struttura lineare e componibile, è perfetta anche come parete divisoria all'interno di un openspace. La libreria può essere accompagnata da una boiserie a parete realizzata con rettangoli di legno, marmo e metallo, incorniciati da fasce di metallo.

Macao, a modular system characterized by aerial compositions that outline the space with lightness and elegance.

Macao, a wall-mounted TV stand, has a square-section metal supporting structure. The shelves can be made in black ash, in Italian walnut, in glass, or in metal, with fully extractable soft-close drawers. The shelves fit together, creating a play of geometries and reflected light. With its linear and modular structure, it is also perfect as a dividing wall inside an open space. The bookcase can be accompanied by a wall paneling made with rectangles of wood, marble, and metal, all framed by metal bands.
